Entertainment Waterparks

WORLD LEADERS IN WATERPARK PLANNING, DESIGN AND ENGINEERING

WTI was established in 1983 and developed to be a leader in planning, design and engineering of waterparks and aquatic destination facilities.

Our now world-renowned firm has grown to over sixty-five professionals including architects, engineers, designers, planners, artists and landscape architects, all dedicated to water entertainment. Our portfolio of work includes recreation and entertainment clients in North America, Europe, Middle East, Asia and Australia. WTI's strength is in realizing the client's vision, incorporating new attraction developments and innovations, and then delivering a technologically superior waterpark project for any location.

CONCEPTUAL DESIGN / MASTERPLANNING

Together we will work to create a plan that enhances and optimizes all of the possibilities.

The goal of the masterplan is to identify all necessary components for a successful waterpark and transform them into a strategy to achieve success. Ultimately, the two most important components for a prosperous waterpark are the park's profitability and its ability to meet the recreational and entertainment needs of its patrons. WTI's conceptual designs are the artistic and 3D translations derived from this comprehensive masterplan. We have successfully performed these pre-design services for clients worldwide.

OUTDOOR WATERPARKS

Quality, reliability and fun!

Limited only by the boundaries of creativity and imagination, outdoor waterparks are adventures that provide a multitude of options for the entire family. The proper mix of one-of-a-kind attractions, multi-generational pools, and theme park-like water rides is essential. WTI creates unique and custom outdoor waterpark designs that take into consideration economic, social and environmental factors.

INDOOR WATERPARKS

Resorts that combine themed lodging and waterpark entertainment have become year-round family vacation destinations.

One of the key amenities to any resort is the pool and surrounding areas. The resort waterpark is no longer a new trend in the industry; it is a fast growing segment of the travel industry that has established itself as a popular destination among visitors looking for high entertainment value.

HOSPITALITY / RESORTS

Purposeful destination-driven design, delivering exclusive and memorable experiences.

Aquatic offerings are specifically designed to enhance the guest experience by providing a luxurious and tranquil escape. Featuring hospitality amenities of all shapes and sizes to maximize the guest experience.

AQUATIC ENGINEERING

WTI understands that a waterpark is only successful when air and water quality are pristine.

Advanced filtration systems, optimum disinfection methods and cutting-edge supplemental sanitation techniques provide healthy, polished water and result in clean, breathable air for guests and staff. Consisting of a team of highly specialized engineers, WTI has built an extensive history of innovative waterpark mechanical design..

SUSTAINABILITY

WTI is committed to energy efficiency, conservation and the use of sustainable building practices.

One of the key amenities to any resort is the pool and surrounding areas. The resort waterpark is no longer a new trend in the industry; it is a fast growing segment of the travel industry that has established itself as a popular destination among visitors looking for high entertainment value.
