WORLD
INWATER.

INTRODUCTION

Water Technology, Inc. (WTI) is a globally recognized leader in aquatic facility design. With a multidisciplinary team, WTI delivers comprehensive solutions across the waterpark, hospitality, recreation, and public sectors. We excel in creative thinking, aquatic engineering, sustainable water treatment systems, ride and attraction integration, and technical innovation, maintaining a client-centric approach.

Every project we undertake begins with a deep respect for the role water plays in community life and a responsibility to design spaces that serve people today and last for generations.

Through **purposeful planning**, we align vision with feasibility, balancing creativity with practicality and long-term operational success.

Through **intentional design**, we shape aquatic environments that are welcoming, intuitive, and inspiring, driven how spaces will be used, experienced, and maintained over time.

Through **engineering expertise**, we prioritize safety, efficiency, sustainability, and reliability, recognizing that behind every memorable aquatic experience is a system that must work seamlessly, day after day.

GLOBAL DELIVERY

Office / Project Leadership Locations
North America, Europe, Middle East, Asia

Our global firm has market-specialized professionals including architects, engineers, designers, artists, landscape architects and planners, all dedicated to water entertainment. Our portfolio of work includes leisure and entertainment clients in North America, Europe, Middle East, Asia and Australia. We design and adhere to the highest standards to enhance and improve process in emerging regions. Our strength lies in combining global best practices with local cultural and market insights.

SERVICES

Offering a complete range of services from design, engineering and construction delivery, WTI has developed very specific and focused teams to deliver the highest standard of service in the industry. We believe in providing the leanest team, with the right skill sets, to be with your project from start to finish. We carefully plan each project through constant interaction between the design, engineering, and construction teams. We continually build upon past experiences to add value to future projects. Our success is a direct product of our ability to provide the proper scope to add value to a project.

DESIGN SERVICES

Through purposeful planning and intentional design, we shape aquatic environments that are welcoming, intuitive, and inspiring. Thoughtful planning allows us to align vision with feasibility, balancing creativity with practicality and long-term operational success. Our designs are not driven by trends alone, but by how spaces will be used, experienced, and maintained over time. We believe great design is as much about function and flow as it is about aesthetics, ensuring facilities are flexible, inclusive, and built to perform.

ENGINEERING SERVICES

Through engineering expertise, we bring rigor, precision, and accountability to every detail. Our technical approach prioritizes safety, efficiency, sustainability, and reliability, recognizing that behind every memorable aquatic experience is a system that must work seamlessly, day after day. We measure success not only by what we create, but by how it performs. Collaboration, integrity, and long-term thinking guide our work, as we strive to be trusted partners throughout the full life cycle of each project.

CONSTRUCTION SERVICES

Through disciplined execution and integrated delivery, we bring aquatic environments to life with precision and accountability. Our construction services focus on predictability, quality, and coordination, aligning planning, procurement, and construction to manage complexity and reduce risk. From early cost control and scheduling through installation, startup, and commissioning, our teams emphasize transparency, craftsmanship, and performance. By remaining engaged through opening and beyond, we ensure each facility is delivered ready to operate, maintain, and succeed – day one and long term.
